

## TrucX DPF CLEAN

- Advanced On-Vehicle Hydrogen Combustion System.
- Treatment with BAC101 Solution Cleans DPF and SCR Systems.
- Restores Power, Reduces Emissions, Eliminates Downtime.
- BAC101-The Heavy-Duty DPF Cleaning Chemical.
- Trusted by Fleet Owners & Diesel Engine Workshops.
- Cleans Your DPF Without Opening One-Box.

## THE PROBLEM: WHY DPFs FAIL

### Diesel particulate filters clog due to:

- Heavy soot accumulation
- Hardened ash deposits
- Oil contamination
- Failed or incomplete regenerations

### When a DPF becomes restricted, it causes:

- Derating of the truck
- Loss of engine power
- High fuel consumption
- Excessive regen cycles
- Turbo stress & overheating
- Costly downtime
- Emission failures

Traditional cleaning method requires removal of DPF Filter, which risks breaking of ceramic filter itself. Breakage of brackets, clamps, rivets, sensors, and replacing gaskets, and often still does not remove contamination of oil and ash completely.

## THE SOLUTION: BAC101

### The Only True On-Vehicle DPF Cleaning System for Commercial Fleets

BAC101 is engineered for Class 6-8 diesel trucks, fleets, waste management trucks, buses, school buses, construction vehicles, all agriculture industry machinery, and diesel engine repair facilities.

### What BAC101 Does

- Dissolves soot, carbon, oil residue, and ash
- Restores DPF airflow & engine performance
- Reduces regen frequency
- Prevents unnecessary DPF replacements
- Restores fuel economy & efficiency
- Keeps fleets operating with minimal downtime

### Why It Works Better

- No DPF removal
- No damage to sensors or brackets
- No expensive downtime
- Cleans deeper than traditional brackets/pressure methods

## DPF & Complete Combustion System Cleaning

Including DPF Filter, DOC, SCR, EGR, & Turbo

**3 HOURS  
SERVICE**

## BENEFITS FOR COMMERCIAL FLEETS

### Fast Service

Clean DPF/SCR and Combustion system in 60 Minute+regen.

### Lower Operating Costs

Avoid thousands in DPF and One-Box replacement costs.

### Higher Fuel Efficiency

Phenomenal diesel consumption savings, and Engines run cleaner, smoother, and cooler.

### Fleet Reliability

Only 3 hours of Downtime, i.e. Trucks back on the road.

### Guarantee

We stand behind our Services and Guarantee 100 % satisfaction. Terms and conditions apply.

### Convenience

We come to your yard rather than you coming to us.

### Free

DPF/Combustion System Health Check Report.

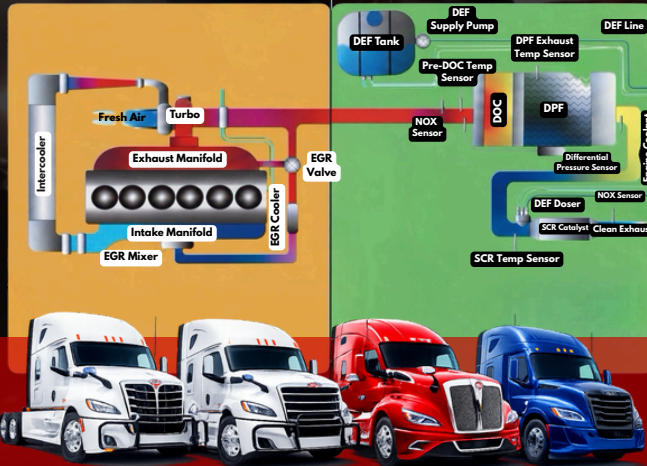

## DPF Filter Cleaning System

(No Open One-Box) **3 Hrs**

HHO Carbon Cleaning:  
EGR, Turbo and Combustion System

Ash, Soot, Chemical Cleaning:  
DOC, DPF, SCR, Hoses & Sensors

## MAGICAL CHEMISTRY OF OUR 2 STAGE APPLICATION

### Benefits

- High Engine Power
- Enhanced Turbo Boost
- Zero Downtime
- Healthy Engine
- Lower Fuel Consumption
- Peak Combustion Efficiency
- Free DPF/Combustion System Health Check Report

## The New Standard for Commercial Diesel Engines Maintenance

- Remove soot, ash, carbon, and oil
- No filter removal
- No damaged sensors
- No downtime
- Improve engine health
- Restore horsepower
- Reduce operating costs

**Keep Your Fleet Running Cleaner, Longer, and More Efficiently.**
